Business Overview

Entegriion is a therapeutic development company that selectively integrates synergistic technologies with those in its patent portfolio for development of novel devices and drugs for hemorrhage control, wound management, and associated tissue repair. The company is based in North Carolina's Research Triangle Park, and is the inventor of Stasilon™ – the medical textile that cuts blood loss – from which multiple wound dressing products are made. Building upon technologies licensed from the University of North Carolina, Entegriion's portfolio includes platelet-derived platform technologies that are being developed as topical gels and sprays for tissue repair, infusible hemostatic agents for the control of internal hemorrhage, and novel vehicles for delivery of drugs to targeted tumors and other sites of internal bleeding.
